Sauce & Spoon

Tablet Rollout Impact Report

Results after the launch

Menu Tablet Rollout

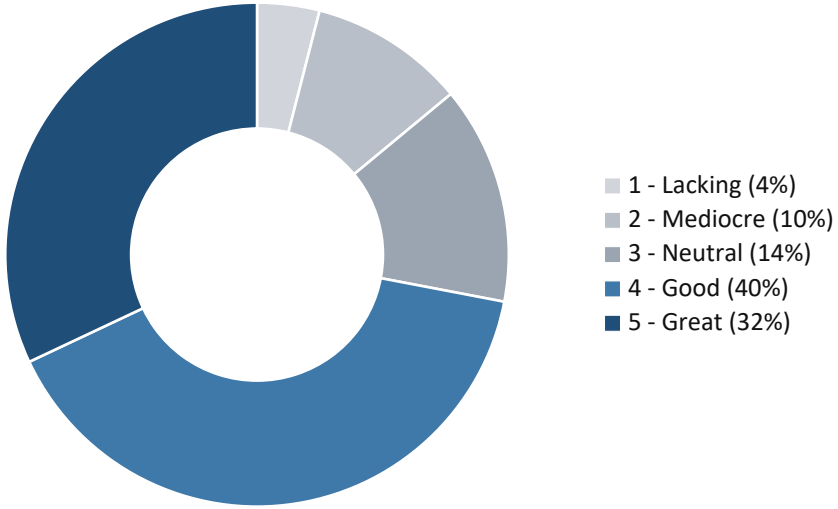

Executive Summary

Sauce & Spoon's sales were growing, but slower service was leading to guest complaints and flat profit margins. The tablet rollout set out to fix this by letting guests order and pay at the table, speeding up service and giving us clear data. After a pilot at two locations, we launched on April 23 with two key results: customer satisfaction rose from **72% to 86%** after we acted on pilot feedback, and monthly revenue grew about **20%** from April to July, with table turn time down **30 minutes**.

Two lessons stand out. We should have planned earlier for each location's operations and team availability, which slowed implementation, and built staff training on guest pacing into the plan from the start, since the tablets alone did not speed up tables. Next, we will create a plan to bring tablets to more locations and continue surveying guests to track satisfaction.

Customer satisfaction: pilot

Q. On a scale of 1-5, please rate your experience with the tablet overall.

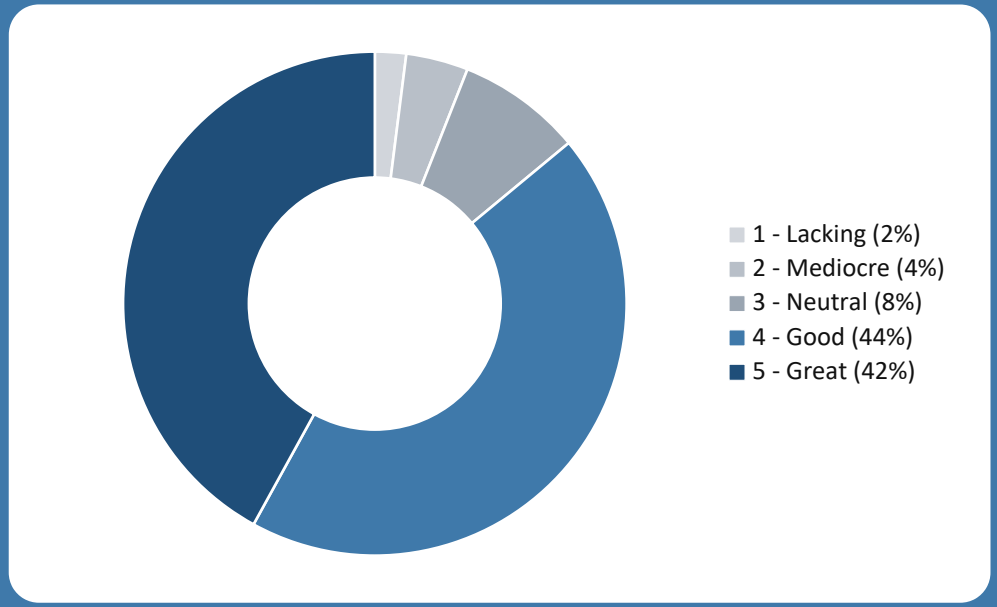

72%

of respondents gave a satisfaction score of 4 or 5 after the pilot.

Source: post-pilot survey, 50 respondents

Customer satisfaction: launch

Q. On a scale of 1-5, please rate your experience with the tablet overall.

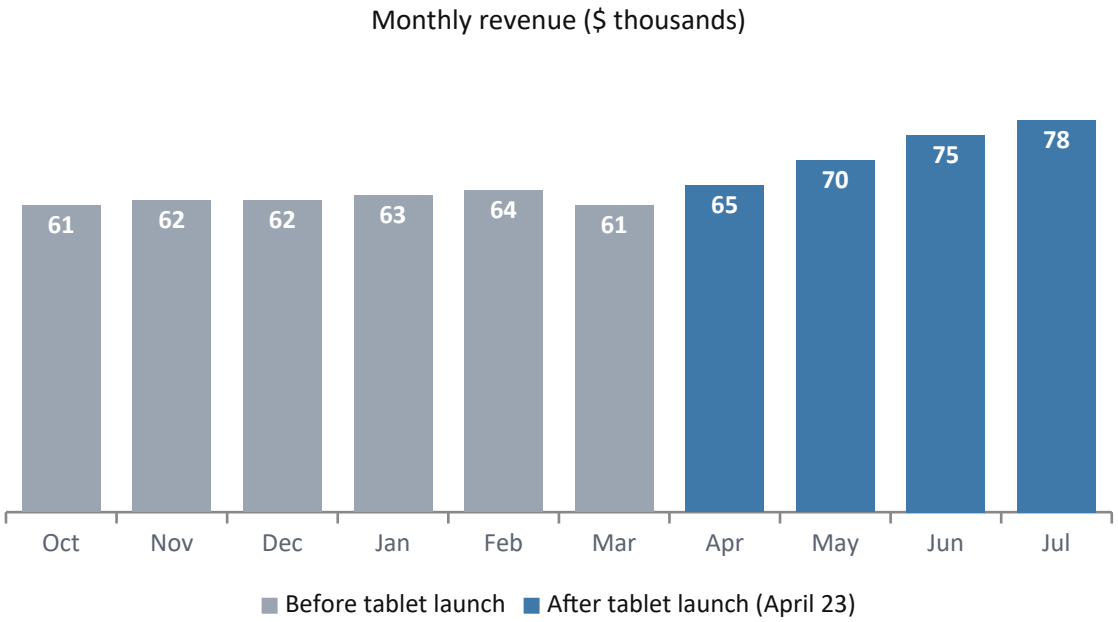

86%

of respondents gave a satisfaction score of 4 or 5 after the launch.

Up 14 points from 72% after the pilot, once we acted on feedback.

Source: post-launch survey, 50 respondents

Revenue grew after the tablet launch

+20%

July revenue vs. April

$65,000 in April to $78,000 in July. Revenue was between $61,000 and $64,000 a month before the tablets.

What worked: key accomplishments

Decreased table turn time

- Downtown's average daily guest count rose 20% after the tablets launched.
- Table turn time fell by 30 minutes, which also shortened guest waits.

Decreased food waste

- Tablets identified who was receiving an incorrect order.
- Kitchen staff has taken the initiative to correct orders and decrease food waste by 25%.

Increased customer satisfaction

- After the pilot, customer satisfaction was at 72%.
- Once we implemented improvements based on feedback, customer satisfaction increased to 86%.

Increased sales

- Our monthly revenue has increased steadily since the tablet rollout, upwards of 20% since September/pre-rollout.
- Tablets also helped boost revenue during the holiday season.

Next steps: looking forward

Initiative	Action	Date
Implement tablets in more locations	Create new project plan for new location installation	**Q2**
Continue to track customer experience and satisfaction	Continue surveying / gathering data through various means	**Ongoing**
Expand tablet features	Investigate new features like social media integration, reservations, videos, etc.	**Q4**
